FULL STACK DEVELOPER - leveraging +5 years of experience

Dedicated and efficient full stack developer with +5 years experience in application layers, presentation layers, and databases. Proficient in building and optimizing user-focused websites and applications. Judicious and creative when crafting effective websites, apps and platforms to propel competitive advantage and revenue growth. Technically proficient and analytical problem solver with calm and focused demeanour.

PROFILE SUMMARY

- Gained hands-on expertise in Bootstrap, Foundation, Express and similar back-end Node.js as well as front-end presentation frameworks web application frameworks
- Highly efficient in designing, developing and implementing software for video surveillance systems,
- Strong experience in Scrum Methodologies, UML and Test Driven Methodologies and MVC based frameworks like spring, Struts, Hibernate.
- Experience in Servlets, JSP, Spring MVC, JDBC, EJB (Session Beans (Stateless and Stateful), Entity Beans and MDB (Message Driven Beans), Custom Tags and JMS.
- Highly efficient in developing software applications involving web-based and native user interfaces and database interaction.
- Adept at contributing to process improvements in software development, project management, and quality assurance.

CORE COMPETENCIES

- | | | |
|--------------------------|------------------------------|--------------|
| ▪ Web Development Stacks | ▪ Database Technology | ▪ Express.js |
| ▪ HTML & CSS | ▪ JavaScript & JS Frameworks | ▪ Web Markup |
| ▪ Next.js | ▪ UI and UX Design | ▪ Node.js |

PROFESSIONAL EXPERIENCE

PCS, Pune

Jan.2020 – Sept. 2021

Senior Full Stack Developer

- Worked closely with the product team to build intelligent search functionality in Angular for an e-commerce site with a catalogue of 2,5000 products leading to an increase in page views per session of 22%
- Improved the page speed by 15% for an e-commerce site that generates \$25M annually in revenue by leveraging browser caching and improving server response times
- Utilized the Django Rest Framework and GraphQL to create APIs for both internal and external use reducing the time to ship new front-end features by 4% FreshDirect
- Responsible for API design and development of RESTful Services For the enterprise product in the business
- Handled building new Angular components for the customer-facing web app which improved the time on page for the average user by 2 minutes
- Worked within an agile team and helped prioritize and scope feature requests to ensure that the biggest impact features were worked on first
- Built extensive test coverage for all new features which reduced the number of customer complaints by 7%

NatWest Group, Pune

Apr. 2022 – Dec 2022

Full Stack Developer

- Built out the user authentication workflow for a B2B app in the finance industry
- Worked alongside two other developers to build a web app that allows designers to add image recognition to their projects using Django on the back-end and Vue on the front-end
- Acted as the point of contact for all critical errors for 3 major client projects and reduced the time to fix the critical errors by 14%
- Created an API product for a consumer finance company that ingested millions of web pages of unstructured data and structured that data to be used in risk propensity modeling interviewed, hired, and trained a team of 8 junior software engineers.
- Developed a highly visible web-app for the people operations team to manage all information related to the organization from structure to compensation to performance feedback using a Vue Front-end and a Node backend with a MySQL database
- Worked closely with C-level executives to identify areas of automation for the people ops team leading to automation tools that saved 80 hours of manual work each month
- Led the development of making the tools accessible to customers leading to \$300,000 in incremental revenue by re-architecting it to allow for multiple organizational accounts and users

Junior Full Stack Developer

- Followed AGILE Methodology for the software development process, part of the cross-functional team for the application development.
- Developed the application using HTML5, CSS3, JavaScript, JQuery, JSP, Node JS, AngularJS Used Angular JS to develop a standalone test application, in the scope of future usage of the framework.
- Used Angular JS as a framework to create a Single Page Application (SPA) which can bind data to specific views and synchronize data with the server.
- Worked with Twitter Bootstrap framework making use of grids, advance components like Navbars, Pagination, Alerts, Progress bars etc.
- Created Angular JS components like controllers, services, directives and forms to collect different user data and implemented form validation in Angular.
- Used JQuery to make Restful API calls and Designed/documented REST APIs for collection and retrieval of high data.
- Worked on JSP, Servlets, Struts framework, and production support issues of the existing applications
- Designed and created a knowledge management platform on a knowledge graph, utilizing a range of technologies, including Node.js, Typescript, Dgraph, React, and Mobx
- Develop and implement a standalone data extraction "agent" and main-application features for a financial product
- Worked on Rest Web Services as well as Node Rest framework for backend services, used MongoDB for database services.

Cognivate, Mumbai

Apr. 2024 – Mar. 2025

Junior Full Stack Developer

- Involved in project plan meetings with clients, business analysts, and team members to analyze business requirements and translated business requirements into the working model using Agile methodology.
- Advanced the view-controller components using Servlets/JSPs, JavaScript, CSS3, HTML5, Bootstrap, SASS and AngularJS.
- Developed a user-friendly interface to seamlessly combine the new module with the existing login system by using AngularJS.
- Designed and developed simulators, validators and integrated them with automation frameworks enabling teams to reach automation goals.
- Used the responsive utilities of the Bootstrap frameworks to facilitate the design displaying properly on different devices.
- Implemented business tier using Spring IOC, AOP, and MVC.
- Used WSDL, SOAP, JAX-WS, JAX-RS, CXF technologies to create web services, generate stubs, and consume the existing services.
- Designed, developed and delivered tools of our engineering team to significantly improve productivity and quality. Implemented latest CSS3 features like creating various effects, shading, 2D 3D animation, Shapes and Handling multimedia
- Used Media Queries to deal with different CSS related issues on mobile devices as well as website to make it compatible.
- Used Bootstrap responsive techniques to build interface for multiple screen resolution.
- Worked in Agile Development and maintained effective communication in team going through all phases of SDLC lifecycle.

ACADEMIC CREDENTIALS
